DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see remarks, pp. 5-6, filed 24 September 2010, with respect to claims 1-11 have been fully considered and are persuasive. The 35 USC 102(b) rejection under WO 03/037506 and 35 USC 102(e) under Kuno (US 20040087440 A1) have been withdrawn.

Terminal Disclaimer

2. The terminal disclaimer filed on 24 September 2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent No. 7,632,776 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

- 3. Claims 1-12 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 6, 9 and 11-15 of copending Application No. 10/589669. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of App.'669 are more specific with designating a ceria-zirconia solid solution. The molar ratio is disclosed in Example 1 of the App'669's specification.
- 4. This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "wherein the content of ceria in the particulate support being 40 to 65 mol% or less" is indefinite. It is unknown what the modifier "or less" is modifying, could be less than 65% or less than 40%. Claim 6 recites the limitations "the zirconia" and "the ceria" in lines 4-7. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

7. In regards to claim(s) 1-5 and 12, if the above ODP rejection is overcome, the following are statements of reasons for the indication of allowable subject matter: In regards to claim(s) 1, prior art does not explicitly disclose, teach or suggest a method for producing a metal oxide particle comprising a core part and a surface layer differing in composition comprising adjusting the pH of a sol to be closer to the isoelectric point of a population of first colloidal particles and then adjusting the pH of a sol to be closer to the isoelectric point of said population of second colloidal particles than to the isoelectric point of said population of first colloid particles. Please note that adjustment is considered to be a dropwise adjustment as illustrated in examples 1 and 2. Kuno is the closest prior art; Kuno discloses first and second populations of colloidal particles and discloses a single stage of pH adjustment (para [0053]); however, Kuno does not explicitly disclose a second stage of pH adjustment. Shiroto et al. (US 4422960 A) discloses a two stage pH adjustment of a metal oxide (col. 24, line 31 to col. 25, line 4),

Application/Control Number: 10/593,629 Page 4

but not of a population of first colloidal particles and a population of second colloidal particles.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NICHOLAS A. SMITH whose telephone number is (571)272-8760. The examiner can normally be reached on 8:30 AM to 5:00 PM, Monday through Friday.

- 9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexa Neckel can be reached on (571)-272-1446. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
